DEPARTMENT OF AGRICULTURE
HEALTH / AGRICULTURE BUILDING
PO Box 330
TRENTON NJ 08625-0330

DOUGLAS H. FISHER
Secretary

December 1, 2009

Ms. Doris Flynn
Byram Township
10 Mansfield Drive
Stanhope, New Jersey 07874

Dear Ms. Flynn:

The New Jersey Department of Agriculture is pleased to report that no major infestations were detected in your municipality from our fall gypsy moth egg mass survey. Therefore, the Department is not recommending any aerial treatment next spring.

The combination of past biological spraying with *Bacillus thuringiensis*, along with declines in gypsy moth population levels caused by fungal and viral diseases as well as parasites and predators, have reduced the population to near innocuous levels in your municipalities forested residential areas.

The Department believes that our policy of exclusively utilizing biological control techniques against the gypsy moth is working very well. Aerial spraying would only be used when egg mass counts are high and defoliation and tree loss are likely.

Thank you for your interest and cooperation in the Department's Gypsy Moth Program. The Department will continue to aerially monitor the gypsy moth population and should it reappear, you will be contacted. Feel free to contact the Department at (609) 292-5442 if you have any other questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Joe W. Zoltowski".

Joseph W. Zoltowski
Chief, Bureau of Plant
Pest & Disease Control
